

# the legendary Kalles Kaviar

Twelve songs, twelve smash hits: Kalles Kaviar's seventh strike.

"Probably The Next Big Thing" - the name of the new record by Kalles Kaviar. Its title song is about a boxer said to be the next big sensation. But the night of the big fight ends in tragedy as our hero gets knocked out in the first round.

The next big thing of the longest serving Swiss ska band Kalles Kaviar, however, is a different story. With "Probably the Next Big Thing", the Basel-based band are releasing their seventh album after almost a quarter of a century of existence.

Twelve new songs are waiting to be heard. It's worth digging in: the riddims pop precisely, the melodies dance beautifully and the hooks hit the heart with relentless precision. If you remain unmoved while listening or even get knocked out in the first round you should perhaps see a doctor.

Since the band's foundation in 1996, Kalles Kaviar have heard time and again that ska will be "the next big thing". The new album's title is a tongue in cheek nod towards those pundits  
Whoever has experienced the band on stage knows why: With Kalles Kaviar, the thing is always big enough. The party anyway. And it always goes into extra time, wherever the eight musicians are on stage.

**Release Date** 20.03. 2020
